

TM04 EXERCISE

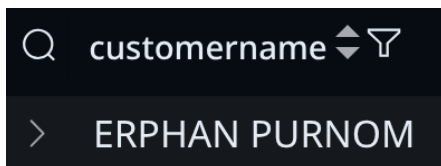

Name : Gilbran Mahdavikia Raja

ID Student : 5025241134

1. SQL:

```
SELECT r.customername
FROM
    receipt r
    JOIN detailitem d ON r.receiptno = d.receiptno
    JOIN album a ON a.albumno = d.albumno
WHERE
    a.releaseyear IN (2016, 2021)
GROUP BY
    r.customername
HAVING
    COUNT(DISTINCT a.releaseyear) = 2;
```

Screenshot:

2. SQL:

```
SELECT DISTINCT
    s.singername
FROM singer s
    JOIN album a ON s.singerid = a.singerid
WHERE
    a.releaseyear < (
        SELECT releaseyear
        FROM album
        WHERE
            albumname = 'LYODRA'
    );
```

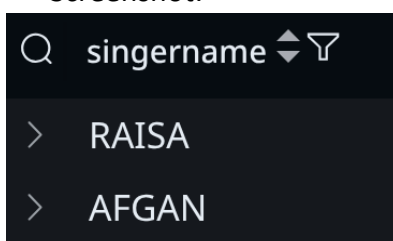

Screenshot:

3. SQL:

```
SELECT DISTINCT
    s.singername
FROM singer s
    JOIN album a ON s.singerid = a.singerid
WHERE
    s.singername <> 'TULUS'
    AND a.price > ANY (
        SELECT al.price
        FROM album al
            JOIN singer si ON al.singerid = si.singerid
        WHERE
            si.singername = 'TULUS'
    );
```

Screenshot:

4. SQL:

```
SELECT    r.customername,    ROUND(SUM(d.totalprice),    1)    AS
total_price
FROM receipt r
    JOIN detailitem d ON r.receiptno = d.receiptno
GROUP BY
    r.customername;
```

Screenshot:

	customername	total_price
>	NATHAN ANDREO	281000.0
>	THRESSYE NATALI/	325000.0
>	ERPHAN PURNOM	720000.0

5. SQL :

```
SELECT ROUND(  
    100.0 * SUM(  
        CASE  
            WHEN s.singername = 'TULUS' THEN d.amount  
            ELSE 0  
        END  
    ) / SUM(d.amount), 2  
    ) AS percentage  
FROM  
    detailitem d  
    JOIN album a ON d.albumno = a.albumno  
    JOIN singer s ON a.singerid = s.singerid;
```
