

Jarkom pertemuan 1.

No 887019

Date 27/08/2025

Introduction

- Internet : Gabungan dari connected computing devices.
- computing devices : perangkat yang mempunyai kemampuan komputasi.
- Perangkat yang digunakan dinamakan hosts. (hosts : end system)
- Aplikasi berjalan pada internet edge.
- didalam internet terdapat banyak jaringan komputer (router, switches) → Penghubung antar end system.
- terdapat 2 tipe Media komunikasi yaitu: wired dan wireless
- Bandwidth → transmission rate (kapasitas)
- Network Edge:
 1. Hosts : client and servers
 2. servers often in data center
- Access network, physical Media:
 1. wired
 2. wireless communication links
- Network core:
 1. interconnected routers
 2. network of networks
- How to connect end system to edge router?
 1. residential access nets
 2. institutional access networks
 3. mobile access networks (WiFi, 4G/5G)
